Hey Jeff,

I am the RPM for the Marine Operable Unit for the Puget Sound Naval Shipyard Superfund Site and I was alerted that the Navy has had 2 significant sewage releases into Sinclair Inlet recently. At my monthly meeting with the Navy, Ecology, and the Suquamish Tribe, I was told that the Navy has an NPDES permit through EPA and these releases would be violations of that permit. I was asked if EPA is taking any enforcement actions against the Navy for these releases. Do you know the answer to that question?

The City of Bremerton also has an outfall right next to the Marine Operable Unit boundary that has had exceedances recently, but I believe that outfall is permitted by Ecology. Do you know about those exceedances or is that something I should contact Ecology about?

Thanks for your help,  
Annie

All,

Attached is a copy of the letter sent to EPA by Public Works following the sewage incident.

Preventive maintenance to include quarterly inspections and cleaning as necessary have been put in place to prevent future occurrence.

Phil
